

Aram Bagdasarian

abagdasarian@college.harvard.edu • arambagdasarian.github.io

Education

Harvard University

Expected May 2027

A.B. in Statistics and Government, double concentration

Coursework includes probability, statistical inference, causal inference, linear models, data science, statistics of networks, multivariable calculus, and linear algebra.

Research Interests

Causal inference, partial identification, language model evaluation, and reliable measurement in quantitative social science.

Workshop Paper

Ali Saffarini and **Aram Bagdasarian**. “Auditing Chain-of-Thought Faithfulness for Trustworthy AI: A Reproducible Corruption-Probe Protocol Across Eleven Frontier LLMs.” *Trustworthy AI for Good (AI4GOOD) Workshop, ICML 2026*. OpenReview.

Research Experience

Harvard University, Department of Government

Aug 2026 - Present

Research Assistant to Guilherme Duarte

Work on partial identification and automated causal bounds using `autobounds`.

Harvard University, Department of Government

Feb 2026 - Present

Research Assistant to Melani Cammett

Built an LLM-assisted article-screening pipeline for a meta-analysis of the political economy of war; worked on data cleaning and effect-size coding.

ZOiS, Centre for East European and International Studies

May 2025 - Present

Data Science Research Intern, Berlin

Collected Russian-language documents and used text-as-data methods and social network analysis to study Russia’s brokerage networks.

Kempner Institute, Harvard University

Aug 2026 - Present

Kure Research Fellow

Benchmark foundation models for neuroimaging against conventional baselines.

Harvard Center for International Development

Sep 2025 - May 2026

Student Research Scholar

Built an audio and visual processing pipeline to classify TikTok content for media-diet measurement.

Central Bank of Armenia

Sep 2024 - Jan 2025

Research Associate

Benchmarked the Bank’s research standards against those of other central banks.

Teaching

American University of Armenia

Summer 2026

Teaching Assistant, CS 252, Data Science. Led lab sections and office hours and supported assignments.

Leadership

Teevial, Founder

Jan 2025 - Present

Founded a data-focused youth organization in Armenia.

Harvard Boxing Club, President

Aug 2025 - May 2026

Technical Skills

Python, R, SQL, Stata, LaTeX, and Git. Tools include PyTorch, scikit-learn, spaCy, NetworkX, and `autobounds`.
